Researchers who read your work

 Read your article's full-text

Thomas E. J. Moxham

DPhil Engineering Science · PhD Student

Institution and department

University of Oxford · Department of Engineering Science

Skills

Optics and Photonics · Photonics · Optoelectronics + 5 others

Read

An exact theory of imaging with a parabolic continuously refractive X-ray lens

[Follow](#)

[Send message](#)

 Read your article's information

Zhi Chen

Doctor of Philosophy · Professor

Institution and department

ShanghaiTech University · Department of Electronic Engineering

Skills

Nanophotonics · Optics and Photonics · Integrated Optics + 11 others

Read

On the role of the entrance slit as an incoherent source in the section topography of ...

 **We're making some changes to your Stats Report**

We'll be changing how many of your readers are displayed.

In the future, you'll be able to see up to 2 new readers each week.

Your most read publications

Show only publications 

An exact theory of imaging with a parabolic continuously refractive X-ray lens

Article

Jul 2003

[View publication stats](#)

1 Recommendation

Effective aperture of X-ray compound refractive lenses

Article

May 2017

[View publication stats](#)

+4

Reads

Current total: 210

 1 Full-text read

On the possibilities of X-ray phase contrast microimaging by coherent high-energy synchrotron radiation

Article

Jan 1996

[View publication stats](#)

+3

Reads

Current total: 451

 2 Full-text reads

Study of micropipe structure in SiC by x-ray phase contrast imaging

Article

Oct 2007

[View publication stats](#)

+3

Reads

Current total: 489

 0 Full-text reads

The investigation of disturbed surface layer structure by the external photoeffect under X-ray diffraction conditions

Article

Jun 1982

[View publication stats](#)

+2

Reads

Current total: 46

 1 Full-text read

[Article](#)

May 2004

[View publication stats](#)

+2 Current total: 58

Reads

 1 Full-text read**Computer simulation of the zernike phase contrast in hard x-ray radiation using refractive lenses and zone plates**[Article](#)

Jan 2014

[View publication stats](#)

+2 Current total: 72

Reads

 0 Full-text reads**Correlated reduction in micropipe cross sections in SiC growth**[Article](#)

Oct 2008

[View publication stats](#)

+1 Current total: 68

Read

 1 Full-text read**Wave theory of focusing monochromator of synchrotron radiation**[Article](#)

Oct 2009

[View publication stats](#)

+1 Current total: 87

Read

 0 Full-text reads**Diffraction imaging of crystals with focused x-ray beams**[Article](#)

+1 Current total: 58
Read
 0 Full-text reads

Isotopic effect on the lattice constant of germanium and silicon

Chapter

May 2012 · The X-ray Standing Waves. Basics and Applications

[View publication stats](#)

+1 Current total: 40
Read
 0 Full-text reads

Contact-free reactions between micropipes in bulk SiC growth

Article

Aug 2012

[View publication stats](#)

+1 Current total: 88
Read
 1 Full-text read

X-ray Standing Waves in Epitaxial Thin Films

Article

May 2004

[View publication stats](#)

+1 Current total: 75
Read
 0 Full-text reads

Synchrotron radiation diffraction in a single crystal of paratellurite investigated with a new experimental scheme

Article

Mar 2020

[View publication stats](#)

 0 Full-text reads

X-ray parabolic lenses made from glassy carbon by means of laser

 Article

Jun 2006

[View publication stats](#)

+1 Current total: 164

Read

 0 Full-text reads

Planar parabolic X-ray refractive lens made of glassy carbon

 Article

May 2005

[View publication stats](#)

+1 Current total: 104

Read

 0 Full-text reads

X-ray Phase Contrast Imaging Technique Using Bilens Interferometer.

 Article

Aug 2018

[View publication stats](#)

+1 Current total: 219

Read

 0 Full-text reads

Interferometric characterization of spatial coherence of high energy synchrotron X-rays

 Article

Nov 2001

[View publication stats](#)

+1 Current total: 114

Read

 0 Full-text reads

Oct 2014

[View publication stats](#)

+1 Current total: 295

Read

 0 Full-text reads
